Energy efficient climate control in museum stores and archives
What are the needs of the collection?
What do the standards recommend
The Segovia castle, Spain. Military archive is in the basement.
How can old buildings be reused?
How should new buildings be designed?
How do we define the multi layer structure and choose materials?

- Gypsum board ceiling
- Absorbent blocks 50mm
- Concrete 240mm
- Insulation to outside 50mm
- Insulation to inside 200mm
Do we need technical equipment and systems?
Can we find a compromise between opposite opinions?
